SRX CLAMP
CARRIERS

THE BEST CLAMPING SOLUTION
FOR PANELS, STAIR COMPONENTS,
RAILS AND POSTS

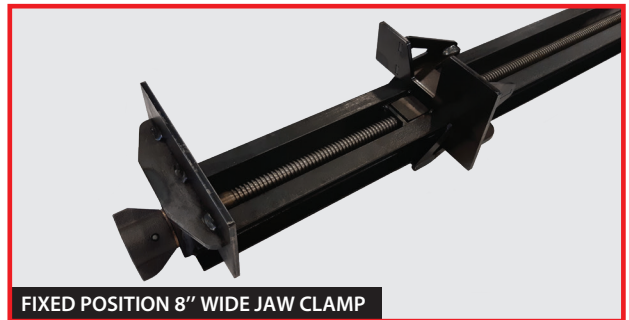

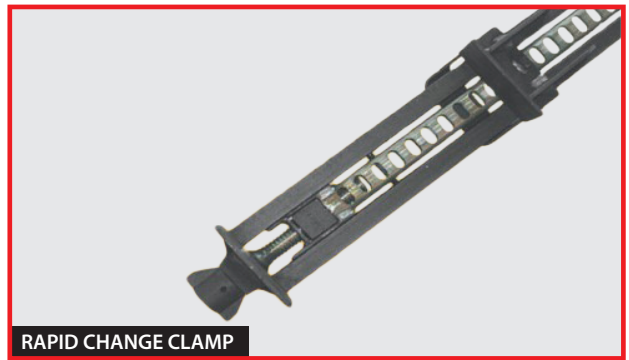

CUTTING EDGE
SOLUTIONS FOR THE
WOODWORKING INDUSTRY

SRX

SRX CLAMP CARRIERS INCLUDE A HYDRAULIC POWER UNIT FOR QUICK ROTATION AND PERFECTLY CALIBRATED TIGHTENING, A PNEUMATICALLY ACTIVATED PANEL FLATTENER AND A PNEUMATICALLY ACTUATED FRONT REST.

SRX Clamp Carriers feature Heavy Duty Clamps, the heaviest and sturdiest in the industry. The "U-shaped" notched bar never bows improving clamp life. The notches on the clamp allow a rapid positioning of the movable jaw and a gain in efficiency. Clamps are designed to deliver the highest clamping force up to 5000 lb. The torque ratio is infinitely adjustable and capable to reach the perfect pressure at the glue joint. The fixed position 8" wide jaw, for high volume applications, increases the productivity by 15 to 20% by removing the non-value-added tasks of the operators to move clamps between panel length changes.

STANDARD FEATURES

- ▶ Clamp Carriers have many configurations from 6 ½' to 24 ½' wide and from 6 to 80 sections
- ▶ Heavy duty clamps: 2 ½" jaw height capacity by 32" opening, Rapid change

OPTIONS

- ▶ Heavy duty clamps: 3 ½" jaw height instead of 2 ½"
- ▶ Lengthened opening up to 52" opening (by increments of 2")
- ▶ Acme screw
- ▶ Fixed position 8" wide jaw
- ▶ Oversized frames available for heaviest load face gluing applications
- ▶ 4" or 6" Clamp Extenders
- ▶ Thin Panel Hold Downs
