More flexible work in the workshop

The ready to hand battery-powered biscuit joiner ensures greater efficiency and flexibility in the workshop.

Large workpieces: No tangling of the cable or the suction hose when machining large workpieces or column cladding

Exclusive individual pieces: Quick production of furniture creations with different angles without complicated programming on the CNC

Adapting furniture: The cordless power tool can be used to easily adapt or add to millings in no time

Mobile working on the construction site

The cordless biscuit joiner makes work on the construction site much easier – there is no need to search for sockets and roll out the cable reel.

Fitted panels: Milling of the fitted panels can be easily and flexibly implemented on site, even if the furniture has been completely machined on the CNC

Roof window casing: For renovation work, the grooves can only be milled directly on site after fitting

Terrace floors: Joining components outdoors, far from a power connection
