

EZYPAC 400 AUTOMATIC BUNDLE STRAPPING SYSTEM

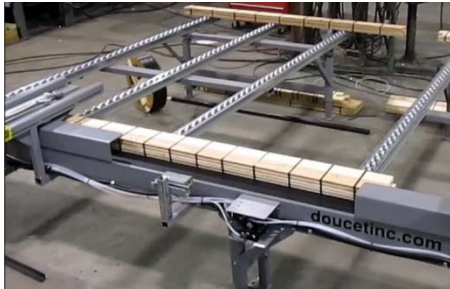

Upon exiting EZYPAC 100 or 200 Nesting Modules nested bundles of flooring are handed off to the **EZYPAC 400 Bundle Strapping System**.

The **EZYPAC 400** can be configured to automatically feed one or two strapping machines operating simultaneously, then strapped bundles are ejected on a gravity conveyor ready to be palletized according to their respective flooring grade.

The **EZYPAC 400** features

- A receiving belt conveyor with adjustable sides
- A top motorized roll to ensure compression of the pack before its hand-off to your banding machine(s) – *banding machine(s) are not included*
- Interface cable for activation the banding cycle by the EXYPAC controller
- The **EZYPAC 400** is compatible with a variety of banding machines, with or without built-in conveyor tops
- MANYX Automatic Palletizers are available for high volume systems

DOUCET

OPTIONS

- An optional second compression roller is available for use with multiple strappers configuration
- Single, dual or multiple palletization ramps are available upon request
